**§110.3. English Language Arts and Reading, Grade 1, Adopted 2017.**

- (a) Knowledge and skills.
- (1) Developing and sustaining foundational language skills: listening, speaking, discussion, and thinking--oral language. The student develops oral language through listening, speaking, and discussion. The student is expected to:
- (A) listen actively, ask relevant questions to clarify information, and make pertinent comments;
  - (B) follow, restate, and give oral instructions that involve a series of related sequences of action;
  - (C) speak coherently about the topic under discussion, employing eye contact, speaking rate, volume, enunciation, and the conventions of language to communicate ideas effectively;
  - (D) work collaboratively with others by following agreed-upon rules, norms, and protocols; and
  - (E) develop social communication such as conversing politely in all situations.
- (2) Developing and sustaining foundational language skills: listening, speaking, reading, writing, and thinking--beginning reading and writing. The student develops word structure knowledge through phonological awareness, print concepts, phonics, and morphology to communicate, decode, and spell. The student is expected to:
- (A) demonstrate and apply phonetic knowledge by:
    - (i) decoding multisyllabic words with multiple sound-spelling patterns such as eigh, ough, and en;
    - (ii) decoding multisyllabic words with closed syllables; open syllables; VCe syllables; vowel teams, including digraphs and diphthongs; r-controlled syllables; and final stable syllables;
    - (iii) decoding compound words, contractions, and abbreviations;
    - (iv) decoding words using knowledge of syllable division patterns such as VCCV, VCV, and VCCCV with accent shifts;
    - (v) decoding words using knowledge of prefixes;
    - (vi) decoding words using knowledge of suffixes, including how they can change base words such as dropping e, changing y to i, and doubling final consonants; and
    - (vii) identifying and reading high-frequency words from a research-based list;
  - (B) demonstrate and apply spelling knowledge by:
    - (i) spelling multisyllabic words with closed syllables; open syllables; VCe syllables; vowel teams, including digraphs and diphthongs; r-controlled syllables; and final stable syllables;
    - (ii) spelling homophones;
    - (iii) spelling compound words, contractions, and abbreviations;
    - (iv) spelling multisyllabic words with multiple sound-spelling patterns;
    - (v) spelling words using knowledge of syllable division patterns

- such as VCCV, VCV, and VCCCV;
  - (vi) spelling words using knowledge of prefixes; and
  - (vii) spelling words using knowledge of suffixes, including how they can change base words such as dropping e, changing y to i, and doubling final consonants;
  - (C) alphabetize a series of words to the third letter; and
  - (D) write complete words, thoughts, and answers legibly in cursive leaving appropriate spaces between words.
- (3) Developing and sustaining foundational language skills: listening, speaking, reading, writing, and thinking--vocabulary. The student uses newly acquired vocabulary expressively. The student is expected to:
- (A) use print or digital resources to determine meaning, syllabication, and pronunciation;
  - (B) use context within and beyond a sentence to determine the meaning of unfamiliar words and multiple-meaning words;
  - (C) identify the meaning of and use words with affixes such as im- (into), non-, dis-, in- (not, non), pre-, -ness, -y, and -ful; and
  - (D) identify, use, and explain the meaning of antonyms, synonyms, idioms, homophones, and homographs in a text.
- (4) Developing and sustaining foundational language skills: listening, speaking, reading, writing, and thinking--fluency. The student reads grade-level text with fluency and comprehension. The student is expected to use appropriate fluency (rate, accuracy, and prosody) when reading grade-level text.
- (5) Developing and sustaining foundational language skills: listening, speaking, reading, writing, and thinking--self-sustained reading. The student reads grade-appropriate texts independently. The student is expected to self-select text and read independently for a sustained period of time.
- (6) Comprehension skills: listening, speaking, reading, writing, and thinking using multiple texts. The student uses metacognitive skills to both develop and deepen comprehension of increasingly complex texts. The student is expected to:
- (A) establish purpose for reading assigned and self-selected texts;
  - (B) generate questions about text before, during, and after reading to deepen understanding and gain information;
  - (C) make and correct or confirm predictions using text features, characteristics of genre, and structures;
  - (D) create mental images to deepen understanding;
  - (E) make connections to personal experiences, ideas in other texts, and society;
  - (F) make inferences and use evidence to support understanding;
  - (G) evaluate details read to determine key ideas;
  - (H) synthesize information to create new understanding; and

- (l) monitor comprehension and make adjustments such as re-reading, using background knowledge, asking questions, and annotating when understanding breaks down.
- (7) Response skills: listening, speaking, reading, writing, and thinking using multiple texts. The student responds to an increasingly challenging variety of sources that are read, heard, or viewed. The student is expected to:
- (A) describe personal connections to a variety of sources, including self-selected texts;
  - (B) write a response to a literary or informational text that demonstrates an understanding of a text;
  - (C) use text evidence to support an appropriate response;
  - (D) retell and paraphrase texts in ways that maintain meaning and logical order;
  - (E) interact with sources in meaningful ways such as notetaking, annotating, freewriting, or illustrating;
  - (F) respond using newly acquired vocabulary as appropriate; and
  - (G) discuss specific ideas in the text that are important to the meaning.
- (8) Multiple genres: listening, speaking, reading, writing, and thinking using multiple texts-- literary elements. The student recognizes and analyzes literary elements within and across increasingly complex traditional, contemporary, classical, and diverse literary texts. The student is expected to:
- (A) infer the theme of a work, distinguishing theme from topic;
  - (B) explain the relationships among the major and minor characters;
  - (C) analyze plot elements, including the sequence of events, the conflict, and the resolution; and
  - (D) explain the influence of the setting on the plot.
- (9) Multiple genres: listening, speaking, reading, writing, and thinking using multiple texts-- genres. The student recognizes and analyzes genre-specific characteristics, structures, and purposes within and across increasingly complex traditional, contemporary, classical, and diverse texts. The student is expected to:
- (A) demonstrate knowledge of distinguishing characteristics of well-known children's literature such as folktales, fables, fairy tales, legends, and myths;
  - (B) explain rhyme scheme, sound devices, and structural elements such as stanzas in a variety of poems;
  - (C) discuss elements of drama such as characters, dialogue, setting, and acts;
  - (D) recognize characteristics and structures of informational text, including:
    - (i) the central idea with supporting evidence;
    - (ii) features such as sections, tables, graphs, timelines, bullets, numbers, and bold and italicized font to support understanding; and
    - (iii) organizational patterns such as cause and effect and

- problem and solution;
- (E) recognize characteristics and structures of argumentative text by:
- (i) identifying the claim;
  - (ii) distinguishing facts from opinion; and
  - (iii) identifying the intended audience or reader; and
- (F) recognize characteristics of multimodal and digital texts.
- (10) Author's purpose and craft: listening, speaking, reading, writing, and thinking using multiple texts. The student uses critical inquiry to analyze the authors' choices and how they influence and communicate meaning within a variety of texts. The student analyzes and applies author's craft purposefully in order to develop his or her own products and performances. The student is expected to:
- (A) explain the author's purpose and message within a text;
  - (B) explain how the use of text structure contributes to the author's purpose;
  - (C) explain the author's use of print and graphic features to achieve specific purposes;
  - (D) describe how the author's use of imagery, literal and figurative language such as simile, and sound devices such as onomatopoeia achieves specific purposes;
  - (E) identify the use of literary devices, including first- or third-person point of view;
  - (F) discuss how the author's use of language contributes to voice; and
  - (G) identify and explain the use of hyperbole.
- (11) Composition: listening, speaking, reading, writing, and thinking using multiple texts-- writing process. The student uses the writing process recursively to compose multiple texts that are legible and uses appropriate conventions. The student is expected to:
- (A) plan a first draft by selecting a genre for a particular topic, purpose, and audience using a range of strategies such as brainstorming, freewriting, and mapping;
  - (B) develop drafts into a focused, structured, and coherent piece of writing by:
    - (i) organizing with purposeful structure, including an introduction and a conclusion; and
    - (ii) developing an engaging idea with relevant details;
  - (C) revise drafts to improve sentence structure and word choice by adding, deleting, combining, and rearranging ideas for coherence and clarity;
  - (D) edit drafts using standard English conventions, including:
    - (i) complete simple and compound sentences with subject-verb agreement;
    - (ii) past, present, and future verb tense;
    - (iii) singular, plural, common, and proper nouns;
    - (iv) adjectives, including their comparative and superlative forms;
    - (v) adverbs that convey time and adverbs that convey manner;
    - (vi) prepositions and prepositional phrases;

- (vii) pronouns, including subjective, objective, and possessive cases;
  - (viii) coordinating conjunctions to form compound subjects, predicates, and sentences;
  - (ix) capitalization of official titles of people, holidays, and geographical names and places;
  - (x) punctuation marks, including apostrophes in contractions and possessives and commas in compound sentences and items in a series; and
  - (xi) correct spelling of words with grade-appropriate orthographic patterns and rules and high-frequency words; and
- (E) publish written work for appropriate audiences.
- (12) Composition: listening, speaking, reading, writing, and thinking using multiple texts-- genres. The student uses genre characteristics and craft to compose multiple texts that are meaningful. The student is expected to:
- (A) compose literary texts, including personal narratives and poetry, using genre characteristics and craft;
  - (B) compose informational texts, including brief compositions that convey information about a topic, using a clear central idea and genre characteristics and craft;
  - (C) compose argumentative texts, including opinion essays, using genre characteristics and craft; and
  - (D) compose correspondence such as thank you notes or letters.
- (13) Inquiry and research: listening, speaking, reading, writing, and thinking using multiple texts. The student engages in both short-term and sustained recursive inquiry processes for a variety of purposes. The student is expected to:
- (A) generate questions on a topic for formal and informal inquiry;
  - (B) develop and follow a research plan with adult assistance;
  - (C) identify and gather relevant information from a variety of sources;
  - (D) identify primary and secondary sources;
  - (E) demonstrate understanding of information gathered;
  - (F) recognize the difference between paraphrasing and plagiarism when using source materials;
  - (G) create a works cited page; and
  - (H) use an appropriate mode of delivery, whether written, oral, or multimodal, to present results.

**§111.5. Mathematics, Grade 3, Adopted 2012.**

- (a) Knowledge and skills.
- (1) Mathematical process standards. The student uses mathematical processes to acquire and demonstrate mathematical understanding. The student is expected to:
    - (A) apply mathematics to problems arising in everyday life, society, and the workplace;
    - (B) use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution;
    - (C) select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate, and techniques, including mental math, estimation, and number sense as appropriate, to solve problems;
    - (D) communicate mathematical ideas, reasoning, and their implications using multiple representations, including symbols, diagrams, graphs, and language as appropriate;
    - (E) create and use representations to organize, record, and communicate mathematical ideas;
    - (F) analyze mathematical relationships to connect and communicate mathematical ideas; and
    - (G) display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication.
  - (2) Number and operations. The student applies mathematical process standards to represent and compare whole numbers and understand relationships related to place value. The student is expected to:
    - (A) compose and decompose numbers up to 100,000 as a sum of so many ten thousands, so many thousands, so many hundreds, so many tens, and so many ones using objects, pictorial models, and numbers, including expanded notation as appropriate;
    - (B) describe the mathematical relationships found in the base-10 place value system through the hundred thousands place;
    - (C) represent a number on a number line as being between two consecutive multiples of 10; 100; 1,000; or 10,000 and use words to describe relative size of numbers in order to round whole numbers; and
    - (D) compare and order whole numbers up to 100,000 and represent comparisons using the symbols  $>$ ,  $<$ , or  $=$ .
  - (3) Number and operations. The student applies mathematical process standards to represent and explain fractional units. The student is expected

to:

- (A) represent fractions greater than zero and less than or equal to one with denominators of 2, 3, 4, 6, and 8 using concrete objects and pictorial models, including strip diagrams and number lines;
  - (B) determine the corresponding fraction greater than zero and less than or equal to one with denominators of 2, 3, 4, 6, and 8 given a specified point on a number line;
  - (C) explain that the unit fraction  $\frac{1}{b}$  represents the quantity formed by one part of a whole that has been partitioned into  $b$  equal parts where  $b$  is a non-zero whole number;
  - (D) compose and decompose a fraction  $\frac{a}{b}$  with a numerator greater than zero and less than or equal to  $b$  as a sum of parts  $\frac{1}{b}$ ;
  - (E) solve problems involving partitioning an object or a set of objects among two or more recipients using pictorial representations of fractions with denominators of 2, 3, 4, 6, and 8;
  - (F) represent equivalent fractions with denominators of 2, 3, 4, 6, and 8 using a variety of objects and pictorial models, including number lines;
  - (G) explain that two fractions are equivalent if and only if they are both represented by the same point on the number line or represent the same portion of a same size whole for an area model; and
  - (H) compare two fractions having the same numerator or denominator in problems by reasoning about their sizes and justifying the conclusion using symbols, words, objects, and pictorial models.
- (4) Number and operations. The student applies mathematical process standards to develop and use strategies and methods for whole number computations in order to solve problems with efficiency and accuracy. The student is expected to:
- (A) solve with fluency one-step and two-step problems involving addition and subtraction within 1,000 using strategies based on place value, properties of operations, and the relationship between addition and subtraction;
  - (B) round to the nearest 10 or 100 or use compatible numbers to estimate solutions to addition and subtraction problems;
  - (C) determine the value of a collection of coins and bills;
  - (D) determine the total number of objects when equally-sized groups of objects are combined or arranged in arrays up to 10 by 10;
  - (E) represent multiplication facts by using a variety of approaches such as repeated addition, equal-sized groups, arrays, area models, equal jumps on a number line, and skip counting;
  - (F) recall facts to multiply up to 10 by 10 with automaticity and recall the corresponding division facts;

- (G) use strategies and algorithms, including the standard algorithm, to multiply a two-digit number by a one-digit number. Strategies may include mental math, partial products, and the commutative, associative, and distributive properties;
  - (H) determine the number of objects in each group when a set of objects is partitioned into equal shares or a set of objects is shared equally;
  - (I) determine if a number is even or odd using divisibility rules;
  - (J) determine a quotient using the relationship between multiplication and division; and
  - (K) solve one-step and two-step problems involving multiplication and division within 100 using strategies based on objects; pictorial models, including arrays, area models, and equal groups; properties of operations; or recall of facts.
- (5) Algebraic reasoning. The student applies mathematical process standards to analyze and create patterns and relationships. The student is expected to:
- (A) represent one- and two-step problems involving addition and subtraction of whole numbers to 1,000 using pictorial models, number lines, and equations;
  - (B) represent and solve one- and two-step multiplication and division problems within 100 using arrays, strip diagrams, and equations;
  - (C) describe a multiplication expression as a comparison such as  $3 \times 24$  represents 3 times as much as 24;
  - (D) determine the unknown whole number in a multiplication or division equation relating three whole numbers when the unknown is either a missing factor or product; and
  - (E) represent real-world relationships using number pairs in a table and verbal descriptions.
- (6) Geometry and measurement. The student applies mathematical process standards to analyze attributes of two-dimensional geometric figures to develop generalizations about their properties. The student is expected to:
- (A) classify and sort two- and three-dimensional figures, including cones, cylinders, spheres, triangular and rectangular prisms, and cubes, based on attributes using formal geometric language;
  - (B) use attributes to recognize rhombuses, parallelograms, trapezoids, rectangles, and squares as examples of quadrilaterals and draw examples of quadrilaterals that do not belong to any of these subcategories;
  - (C) determine the area of rectangles with whole number side lengths in problems using multiplication related to the number of rows times the number of unit squares in each row;
  - (D) decompose composite figures formed by rectangles into non-overlapping rectangles to determine the area of the original figure using the additive property of area; and

- (E) decompose two congruent two-dimensional figures into parts with equal areas and express the area of each part as a unit fraction of the whole and recognize that equal shares of identical wholes need not have the same shape.
- (7) Geometry and measurement. The student applies mathematical process standards to select appropriate units, strategies, and tools to solve problems involving customary and metric measurement. The student is expected to:
- (A) represent fractions of halves, fourths, and eighths as distances from zero on a number line;
  - (B) determine the perimeter of a polygon or a missing length when given perimeter and remaining side lengths in problems;
  - (C) determine the solutions to problems involving addition and subtraction of time intervals in minutes using pictorial models or tools such as a 15-minute event plus a 30-minute event equals 45 minutes;
  - (D) determine when it is appropriate to use measurements of liquid volume (capacity) or weight; and
  - (E) determine liquid volume (capacity) or weight using appropriate units and tools.
- (8) Data analysis. The student applies mathematical process standards to solve problems by collecting, organizing, displaying, and interpreting data. The student is expected to:
- (A) summarize a data set with multiple categories using a frequency table, dot plot, pictograph, or bar graph with scaled intervals; and
  - (B) solve one- and two-step problems using categorical data represented with a frequency table, dot plot, pictograph, or bar graph with scaled intervals.
- (9) Personal financial literacy. The student applies mathematical process standards to manage one's financial resources effectively for lifetime financial security. The student is expected to:
- (A) explain the connection between human capital/labor and income;
  - (B) describe the relationship between the availability or scarcity of resources and how that impacts cost;
  - (C) identify the costs and benefits of planned and unplanned spending decisions;
  - (D) explain that credit is used when wants or needs exceed the ability to pay and that it is the borrower's responsibility to pay it back to the lender, usually with interest;
  - (E) list reasons to save and explain the benefit of a savings plan, including for college; and

- (F) identify decisions involving income, spending, saving, credit, and charitable giving.<sup>9</sup>

**§112.5. Science, Grade 3, Adopted 2021.**

- (a) Knowledge and skills.
  - (1) Scientific and engineering practices. The student asks questions, identifies problems, and plans and safely conducts classroom, laboratory, and field investigations to answer questions, explain phenomena, or design solutions using appropriate tools and models. The student is expected to:
    - (A) ask questions and define problems based on observations or information from text, phenomena, models, or investigations;
    - (B) use scientific practices to plan and conduct descriptive investigations and use engineering practices to design solutions to problems;
    - (C) demonstrate safe practices and the use of safety equipment during classroom and field investigations as outlined in Texas Education Agency-approved safety standards;
    - (D) use tools, including hand lenses; metric rulers; Celsius thermometers; wind vanes; rain gauges; graduated cylinders; beakers; digital scales; hot plates; meter sticks; magnets; notebooks; Sun, Earth, Moon system models; timing devices; materials to support observation of habitats of organisms such as terrariums, aquariums, and collecting nets; and materials to support digital data collection such as computers, tablets, and cameras, to observe, measure, test, and analyze information;
    - (E) collect observations and measurements as evidence;
    - (F) construct appropriate graphic organizers to collect data, including tables, bar graphs, line graphs, tree maps, concept maps, Venn diagrams, flow charts or sequence maps, and input-output tables that show cause and effect; and
    - (G) develop and use models to represent phenomena, objects, and processes or design a prototype for a solution to a problem.
  - (2) Scientific and engineering practices. The student analyzes and interprets data to derive meaning, identify features and patterns, and discover relationships or correlations to develop evidence-based arguments or evaluate designs. The student is expected to:
    - (A) identify advantages and limitations of models such as their size, scale, properties, and materials;
    - (B) analyze data by identifying any significant features, patterns,

- or sources of error;
  - (C) use mathematical calculations to compare patterns and relationships; and
  - (D) evaluate a design or object using criteria.
- (3) Scientific and engineering practices. The student develops evidence-based explanations and communicates findings, conclusions, and proposed solutions. The student is expected to:
- (A) develop explanations and propose solutions supported by data and models;
  - (B) communicate explanations and solutions individually and collaboratively in a variety of settings and formats; and
  - (C) listen actively to others' explanations to identify relevant evidence and engage respectfully in scientific discussion.
- (4) Scientific and engineering practices. The student knows the contributions of scientists and recognizes the importance of scientific research and innovation for society. The student is expected to:
- (A) explain how scientific discoveries and innovative solutions to problems impact science and society; and
  - (B) research and explore resources such as museums, libraries, professional organizations, private companies, online platforms, and mentors employed in a science, technology, engineering, and mathematics (STEM) field to investigate STEM careers.
- (5) Recurring themes and concepts. The student understands that recurring themes and concepts provide a framework for making connections across disciplines. The student is expected to:
- (A) identify and use patterns to explain scientific phenomena or to design solutions;
  - (B) identify and investigate cause-and-effect relationships to explain scientific phenomena or analyze problems;
  - (C) use scale, proportion, and quantity to describe, compare, or model different systems;
  - (D) examine and model the parts of a system and their interdependence in the function of the system;
  - (E) investigate the flow of energy and cycling of matter through systems;
  - (F) explain the relationship between the structure and function of objects, organisms, and systems; and

- (G) explain how factors or conditions impact stability and change in objects, organisms, and systems.
- (6) Matter and energy. The student knows that matter has measurable physical properties that determine how matter is identified, classified, changed, and used. The student is expected to:
- (A) measure, test, and record physical properties of matter, including temperature, mass, magnetism, and the ability to sink or float in water;
  - (B) describe and classify samples of matter as solids, liquids, and gases and demonstrate that solids have a definite shape and that liquids and gases take the shape of their container;
  - (C) predict, observe, and record changes in the state of matter caused by heating or cooling in a variety of substances such as ice becoming liquid water, condensation forming on the outside of a glass, or liquid water being heated to the point of becoming water vapor (gas); and
  - (D) demonstrate that materials can be combined based on their physical properties to create or modify objects such as building a tower or adding clay to sand to make a stronger brick and justify the selection of materials based on their physical properties.
- (7) Force, motion, and energy. The student knows the nature of forces and the patterns of their interactions. The student is expected to:
- (A) demonstrate and describe forces acting on an object in contact or at a distance, including magnetism, gravity, and pushes and pulls; and
  - (B) plan and conduct a descriptive investigation to demonstrate and explain how position and motion can be changed by pushing and pulling objects such as swings, balls, and wagons.
- (8) Force, motion, and energy. The student knows that energy is everywhere and can be observed in cycles, patterns, and systems. The student is expected to:
- (A) identify everyday examples of energy, including light, sound, thermal, and mechanical; and
  - (B) plan and conduct investigations that demonstrate how the speed of an object is related to its mechanical energy.
- (9) Earth and space. The student knows there are recognizable objects and patterns in Earth's solar system. The student is expected to:
- (A) construct models and explain the orbits of the Sun, Earth, and

- Moon in relation to each other; and
- (B) identify the order of the planets in Earth's solar system in relation to the Sun.
- (10) Earth and space. The student knows that there are recognizable processes that change Earth over time. The student is expected to:
- (A) compare and describe day-to-day weather in different locations at the same time, including air temperature, wind direction, and precipitation;
- (B) investigate and explain how soils such as sand and clay are formed by weathering of rock and by decomposition of plant and animal remains; and
- (C) model and describe rapid changes in Earth's surface such as volcanic eruptions, earthquakes, and landslides.
- (11) Earth and space. The student understands how natural resources are important and can be managed. The student is expected to:
- (A) explore and explain how humans use natural resources such as in construction, in agriculture, in transportation, and to make products;
- (B) explain why the conservation of natural resources is important; and
- (C) identify ways to conserve natural resources through reducing, reusing, or recycling.
- (12) Organisms and environments. The student describes patterns, cycles, systems, and relationships within environments. The student is expected to:
- (A) explain how temperature and precipitation affect animal growth and behavior through migration and hibernation and plant responses through dormancy;
- (B) identify and describe the flow of energy in a food chain and predict how changes in a food chain such as removal of frogs from a pond or bees from a field affect the ecosystem;
- (C) describe how natural changes to the environment such as floods and droughts cause some organisms to thrive and others to perish or move to new locations; and
- (D) identify fossils as evidence of past living organisms and environments, including common Texas fossils.
- (13) Organisms and environments. The student knows that organisms undergo similar life processes and have structures that function to

help them survive within their environments. The student is expected to:

- (A) explore and explain how external structures and functions of animals such as the neck of a giraffe or webbed feet on a duck enable them to survive in their environment; and
- (B) explore, illustrate, and compare life cycles in organisms such as beetles, crickets, radishes, or lima beans.

**§113.14. Social Studies, Grade 3, Adopted 2018.**

- (a) Knowledge and skills.
  - (1) History. The student understands how individuals, events, and ideas have influenced the history of various communities. The student is expected to:
    - (A) describe how individuals, events, and ideas have changed communities, past and present;
    - (B) identify individuals, including Pierre-Charles L'Enfant, Benjamin Banneker, and Benjamin Franklin, who have helped to shape communities; and
    - (C) describe how individuals, including Daniel Boone and the Founding Fathers have contributed to the expansion of existing communities or to the creation of new communities.
  - (2) History. The student understands common characteristics of communities, past and present. The student is expected to:
    - (A) identify reasons people have formed communities, including a need for security and laws, religious freedom, and material well-being; and
    - (B) compare ways in which people in the local community and other communities meet their needs for government, education, communication, transportation, and recreation.
  - (3) Geography. The student understands how humans adapt to and/or modify the physical environment. The student is expected to:
    - (A) describe similarities and differences in the physical environment, including climate, landforms, natural resources, and natural hazards;
    - (B) identify and compare how people in different communities adapt to or modify the physical environment in which they live such as deserts, mountains, wetlands, and plains; and
    - (C) describe the effects of human processes such as building new homes, conservation, and pollution in shaping the landscape.
  - (4) Geography. The student understands the concepts of location, distance, and direction on maps and globes. The student is expected to:
    - (A) use cardinal and intermediate directions to locate places on maps and globes in relation to the local community;
    - (B) use a scale to determine the distance between places on maps and globes; and
    - (C) identify, create, and interpret maps of places that contain map elements, including a title, compass rose, legend, scale, and grid system.
  - (5) Economics. The student understands the purposes of earning, spending, saving, and donating money. The student is expected to:
    - (A) identify ways of earning, spending, saving, and donating money; and
    - (B) create a simple budget that allocates money for spending and saving.
  - (6) Economics. The student understands the concept of the free enterprise

- system and how businesses operate in the U.S. free enterprise system. The student is expected to:
- (A) explain how supply and demand affect the price of a good or service;
  - (B) define and identify examples of scarcity;
  - (C) explain how the cost of production and selling price affect profits; and
  - (D) identify individuals, past and present, such as Henry Ford and Sam Walton who have started new businesses.
- (7) Government. The student understands the basic structure and functions of various levels of government. The student is expected to:
- (A) describe the basic structure of government in the local community, state, and nation;
  - (B) identify local, state, and national government officials and explain how they are chosen; and
  - (C) identify services commonly provided by local, state, and national governments.
- (8) Government. The student understands important ideas in historical documents at various levels of government. The student is expected to:
- (A) identify the purposes of the Declaration of Independence and the U.S. Constitution, including the Bill of Rights; and
  - (B) describe the concept of "consent of the governed. "
- (9) Citizenship. The student understands characteristics of good citizenship as exemplified by historical and contemporary figures and organizations. The student is expected to:
- (A) identify characteristics of good citizenship, including truthfulness, justice, equality, respect for oneself and others, responsibility in daily life, and participation in government by educating oneself about the issues, respectfully holding public officials to their word, and voting;
  - (B) identify figures such as Helen Keller, Clara Barton, and Ruby Bridges who exemplify good citizenship;
  - (C) identify and describe individual acts of civic responsibility, including obeying laws, serving and improving the community, serving on a jury, and voting; and
  - (D) identify examples of nonprofit and/or civic organizations such as the Red Cross and explain how they serve the common good.
- (10) Culture. The student understands ethnic and/or cultural celebrations of the local community and other communities. The student is expected to:
- (A) explain the significance of various ethnic and/or cultural celebrations in the local community and other communities; and
  - (B) compare ethnic and/or cultural celebrations in the local community with other communities.
- (11) Culture. The student understands the role of heroes in shaping the culture of communities, the state, and the nation. The student is

expected to:

- (A) identify and describe the heroic deeds of state and national heroes and military and first responders such as Hector P. Garcia, James A. Lovell, and the Four Chaplains; and
  - (B) identify and describe the heroic deeds of individuals such as Harriet Tubman, Todd Beamer, and other contemporary heroes.
- (12) Culture. The student understands the importance of writers and artists to the cultural heritage of communities. The student is expected to identify how various writers and artists such as Kadir Nelson, Tomie dePaola, Carmen Lomas Garza, and Laura Ingalls Wilder and their stories, poems, statues, and paintings contribute to the cultural heritage of communities.
- (13) Science, technology, and society. The student understands how individuals have created or invented new technology and affected life in various communities, past and present. The student is expected to:
- (A) identify individuals who have discovered scientific breakthroughs or created or invented new technology such as Jonas Salk, Cyrus McCormick, Bill Gates, Louis Pasteur, and others; and
  - (B) describe the impact of scientific breakthroughs and new technology in computers, pasteurization, and medical vaccines on various communities.
- (14) Social studies skills. The student applies critical-thinking skills to organize and use information acquired from a variety of valid sources, including technology. The student is expected to:
- (A) gather information, including historical and current events and geographic data, about the community using a variety of resources;
  - (B) interpret oral, visual, and print material by sequencing, categorizing, identifying the main idea, distinguishing between fact and opinion, identifying cause and effect, comparing, and contrasting; and
  - (C) interpret and create visuals, including graphs, charts, tables, timelines, illustrations, and maps.
- (15) Social studies skills. The student communicates in written, oral, and visual forms. The student is expected to:
- (A) use social studies terminology correctly;
  - (B) create and interpret timelines;
  - (C) apply the terms year, decade, and century to describe historical times;
  - (D) express ideas orally based on knowledge and experiences; and
  - (E) create written and visual material such as stories, pictures, maps, and graphic organizers to express ideas.
- (16) Social studies skills. The student uses problem-solving and decision-making skills, working independently and with others. The student is expected to use problem-solving and decision-making processes to identify a problem, gather

information, list and consider options, consider advantages and disadvantages, choose and implement a solution, and evaluate the effectiveness of the solution.

**§114.4. Languages Other Than English, Elementary, Adopted 2014.**

- (a) According to the National Standards for Foreign Language Learning, advanced level language proficiency is necessary for college and career readiness. To that end, students should have uninterrupted, consistent access to early standards-based learning experiences in languages other than English. School districts are strongly encouraged to offer languages other than English in the elementary grades in immersion or Foreign Language in Elementary Schools (FLES) settings with consistent and frequent exposure. For districts that offer languages in elementary school, the expected student outcomes are the same as those designated at levels I-IV in Subchapter C of this chapter (relating to Texas Essential Knowledge and Skills for Languages Other Than English).
- (b) Districts may offer a level of a language in a variety of scheduling arrangements that may extend or reduce the traditional schedule when careful consideration is given to the instructional time available on a campus and the language ability, access to programs, and motivation of students.

**§115.15. Health Education, Grade 3. Adopted 2020.**

- (a) Knowledge and skills.
- (1) Physical health and hygiene--body systems. The student examines the structure, function, and relationships of body systems and their relevance to personal health. The student is expected to name, locate, and describe the primary functions and major components of body systems, including the skeletal, muscular, circulatory, and respiratory systems.
  - (2) Physical health and hygiene--personal health and hygiene. The student understands health literacy, preventative health behaviors, and how to access and evaluate health care information to make informed decisions. The student is expected to:
    - (A) explain the importance of seeking assistance in making decisions about health;
    - (B) describe methods of accessing information about health;
    - (C) identify the benefits of decision making about personal health;
    - (D) identify the importance of taking personal responsibility for developing and maintaining personal hygiene and health habits;
    - (E) explain ways in which germs are transmitted, methods of preventing the spread of germs, and the importance of immunization;
    - (F) identify that there are diseases such as allergies, asthma, diabetes, and epilepsy that are not caused by germs; and
    - (G) identify common vectors, including ticks and mosquitos, and explain how and when to perform a self-check for vectors.
  - (3) Mental health and wellness--social and emotional health. The student identifies and applies strategies to develop socio-emotional health, self-regulation, and healthy relationships. The student is expected to:
    - (A) communicate needs, wants, and emotions in healthy ways;
    - (B) describe strategies for assessing thoughts and applying calming and self-management practices;
    - (C) discuss and explain how the brain develops through maturation;
    - (D) distinguish between healthy and harmful influences of friends and others;
    - (E) describe the characteristics of healthy and unhealthy friendships;
    - (F) describe the value of respectful communication;
    - (G) discuss how others may experience situations differently than oneself; and
    - (H) demonstrate strategies for resolving conflicts.

- (4) Mental health and wellness--developing a healthy self-concept. The student develops the capacity for self-assessment and evaluation, goal setting, and decision making in order to develop a healthy self-concept. The student is expected to:
  - (A) define self-esteem and ways it is formed, including identifying areas for one's personal growth; and
  - (B) describe the importance of seeking guidance from a parent or another trusted adult in setting goals.
- (5) Mental health and wellness--identifying and managing mental health and wellness concerns. The student will develop and use appropriate skills to identify and manage conditions related to mental health and wellness. The student is expected to:
  - (A) describe methods for managing challenges related to long-term health conditions;
  - (B) describe strategies to support others in managing different learning needs;
  - (C) describe positive outcomes of stress, including creativity, focus, energy, drive, and purpose;
  - (D) describe and practice healthy behaviors that reduce stress; and
  - (E) describe the importance of acceptance of oneself and others.
- (6) Healthy eating and physical activity--food and beverage daily recommendations. The student identifies and explains healthy eating strategies for enhancing and maintaining personal health throughout the lifespan. The student is expected to:
  - (A) classify foods by the nutrients they provide;
  - (B) plan a balanced meal that follows government nutrition guidelines;
  - (C) examine nutrition labels to identify the difference between foods containing natural sugars and foods with added sugars or sweeteners; and
  - (D) identify and categorize foods based on saturated and unsaturated fat content.
- (7) Healthy eating and physical activity--nutrition and physical activity literacy. The student obtains, processes, and understands basic physical activity and nutrition information needed to make health-promoting decisions. The student is expected to describe the importance of accessing health information through a variety of credible health resources.
- (8) Healthy eating and physical activity--risk and protective factors. The student identifies and explains risk and protective factors related to healthy eating

and physical activity. The student is expected to:

- (A) identify the common food allergens listed on food packaging; and
  - (B) describe how healthy and unhealthy behaviors affect body systems and demonstrate refusal skills in dealing with unhealthy eating situations.
- (9) Injury and violence prevention and safety--safety skills and unintentional injury. The student identifies and demonstrates safety and first aid knowledge to prevent and treat injuries. The student is expected to develop a home-safety and emergency response plan such as a fire safety plan.
- (10) Injury and violence prevention and safety--healthy relationships and conflict-resolution skills. The student differentiates between healthy and unhealthy relationships and demonstrates effective strategies to address conflict. The student is expected to identify refusal skills such as saying "no" when privacy, personal boundaries, or personal space are not respected.
- (11) Injury and violence prevention and safety--healthy home, school, and community climate. The student understands that individual actions and awareness can impact safety, community, and environment. The student is expected to:
- (A) identify reasons for avoiding violence, gangs, weapons, and drugs;
  - (B) identify characteristics of safe home, school, and community environments;
  - (C) discuss the hazards of unsupervised and improper handling of guns and other weapons; and
  - (D) create a personal safety plan.
- (12) Injury and violence prevention and safety--digital citizenship and media. The student understands how to be a safe and responsible citizen in digital and online environments. The student is expected to:
- (A) identify and discuss the need for safety awareness in a digital or online environment;
  - (B) identify appropriate ways to communicate in digital and online environments;
  - (C) discuss who is appropriate to communicate with and what is appropriate information to share in digital and online environments; and
  - (D) explain consequences that result from cyberbullying and inappropriate digital and online usage.
- (13) Injury and violence prevention and safety--interpersonal violence. The student understands the impact of interpersonal violence and the

importance of seeking guidance and help to maintain personal safety. The student is expected to:

- (A) describe how to effectively respond to bullying and cyberbullying of oneself or others;
  - (B) explain the importance of seeking assistance in making decisions about personal safety; and
  - (C) define abuse and neglect.
- (14) Alcohol, tobacco, and other drugs--use, misuse, and physiological effects. The student understands the difference between the use and misuse of different substances and how the use and misuse of substances impacts health. The student is expected to:
- (A) identify misuse and proper use of over-the-counter and prescription drugs; and
  - (B) describe the harmful effects of alcohol, tobacco, other drugs, and dangerous substances, including inhalants, vaping products, and household products, on physical health.
- (15) Alcohol, tobacco, and other drugs--short- and long-term impacts. The student identifies and analyzes the short- and long-term impacts of the use and misuse of alcohol; tobacco; drugs, including prescription drugs; and other substances. The student is expected to describe the harmful effects of alcohol, tobacco, other drugs, and dangerous substances such as inhalants and household products on mental and social health.
- (16) Alcohol, tobacco, and other drugs--treatment. The student understands how to seek emergency help for self and others in poisoning and overdose situations. The student is expected to describe the signs of poisoning or overdose and identify how to respond, including who to contact for help.
- (17) Alcohol, tobacco, and other drugs--risk and protective factors. The student understands how various factors can influence decisions regarding substance use and the resources available for help. The student is expected to:
- (A) describe how friends can influence a person's decision to use or not use alcohol or drugs; and
  - (B) describe the difference between reporting and tattling and why it is important to report the use of alcohol, tobacco, and other drugs by friends or peers.
- (18) Alcohol, tobacco, and other drugs--prevention. The student demonstrates refusal skills to avoid substance use and misuse. The student is expected to demonstrate refusal skills related to alcohol, tobacco, and other drugs using assertive communication.

**§116.15. Physical Education, Grade 3. Adopted 2020.**

- (a) Knowledge and skills.
  - (1) Movement patterns and movement skills--locomotor skills. The physically literate student demonstrates competency in fundamental movement patterns and developmentally appropriate locomotor skills. The student is expected to:
    - (A) demonstrate correct technique while hopping, galloping, running, sliding, skipping, and leaping;
    - (B) demonstrate correct jumping and landing technique from different heights;
    - (C) demonstrate intermediate balancing to include equipment, cross lateralization using a variety of coordination skills, and sequencing of three skills with repetition; and
    - (D) spin and roll with control at different levels, speeds, and positions with manipulatives.
  - (2) Movement patterns and movement skills--non-locomotor skills. The physically literate student demonstrates competency in fundamental movement patterns and developmentally appropriate non-locomotor skills. The student is expected to:
    - (A) demonstrate moving in and out of a balanced position with control during dynamic activities; and
    - (B) combine bending, stretching, twisting, curling, pushing, pulling, and swaying in a variety of activities.
  - (3) Movement patterns and movement skills--manipulative skills. The physically literate student demonstrates competency in developmentally appropriate manipulative skills. The student is expected to:
    - (A) demonstrate key elements in underhand and overhand throwing to a partner with accuracy;
    - (B) demonstrate key elements when catching an accurately and softly thrown large ball with a partner without trapping against the body;
    - (C) demonstrate key elements of hand dribbling while slowly jogging and maintaining ball control;
    - (D) dribble a ball with control using both feet while slowly jogging;
    - (E) kick a moving ball on the ground and in the air using a continuous running approach;
    - (F) demonstrate correct technique in volleying to a wall or partner and over an object or net;
    - (G) demonstrate correct technique when striking a moving object over a

- low net or to a wall with a hand or short- or long-handled implement;
  - (H) jump a self-turned rope using a variety of basic skills; and
  - (I) enter and exit a turned long rope using basic jumping skills.
- (4) Movement patterns and movement skills--spatial and body awareness. The physically literate student demonstrates competency in spatial and body awareness, including pathways, shapes, levels, speed, direction, and force. The student is expected to:
- (A) demonstrate locomotor, non-locomotor, and manipulative skills safely in personal and open space;
  - (B) combine pathways and levels into various movement patterns in a wide variety of physical activities; and
  - (C) combine speed, direction, and force as directed by teacher.
- (5) Movement patterns and movement skills--rhythmic activities. The physically literate student demonstrates competency in rhythmic activities and rhythmic combinations. The student is expected to demonstrate various rhythmic combinations of locomotor skills of eight counts in repeatable patterns when leading or following a partner.
- (6) Performance strategies--games and activities. The physically literate student demonstrates competency in performance strategies in invasion, target, net or wall, fielding, striking, and cooperative games. The student is expected to:
- (A) combine the skills of chasing, fleeing, and dodging to avoid or catch others during a variety of games;
  - (B) demonstrate specific movement skills to improve performance in designated dynamic activities; and
  - (C) explain and follow rules, procedures, and safe practices during games and activities.
- (7) Performance strategies--outdoor and recreational pursuits. The physically literate student demonstrates competency in outdoor and recreational pursuits. The student is expected to participate in introductory outdoor recreational skills and activities such as rock climbing, hiking, paddle sports, disc golf, or challenge courses.
- (8) Health, physical activity, and fitness--fitness principles. The physically literate student demonstrates and recognizes a health-enhancing, physically active lifestyle. The student is expected to:
- (A) describe the benefits of regular physical activity, including stress management;
  - (B) identify the importance of frequency and intensity during endurance activities; and

- (C) explain and demonstrate the correct techniques of health-related fitness components.
- (9) Health, physical activity, and fitness--analyze data. The physically literate student demonstrates competency in the ability to analyze data used during fitness performance. The student is expected to:
- (A) describe the importance of setting personal fitness goals in improving health-related fitness; and
  - (B) identify how to measure improvement and track progress for health-related fitness.
- (10) Health, physical activity, and fitness--nutrition and hydration. The physically literate student recognizes the correlation between nutrition, hydration, and physical activity. The student is expected to:
- (A) differentiate between healthy and unhealthy foods and their impact on sustainable energy for physical activity; and
  - (B) differentiate between water and processed sugar or high-calorie drinks and their impact on sustainable energy for physical activity.
- (11) Health, physical activity, and fitness--environmental awareness and safety practices. The physically literate student demonstrates competency in environmental awareness and understands safety practices. The student is expected to:
- (A) select proper attire and safety equipment that promote safe participation and prevent injury in a variety of physical activities; and
  - (B) exhibit correct safety precautions, including pedestrian, water, sun, cycling, skating, and scooter safety.
- (12) Social and emotional health--personal responsibility and self-management. The physically literate student demonstrates competency in personal responsibility. The student is expected to:
- (A) explain that personal actions have consequences for self and others;
  - (B) demonstrate respect for differences and similarities in abilities of self and others; and
  - (C) explain and demonstrate self-management skills to control personal impulses and emotions.
- (13) Social and emotional health--resolving conflict and social interaction. The physically literate student demonstrates competency in resolving conflict and social interaction. The student is expected to:
- (A) demonstrate respect and cooperation through words and actions during various group activities; and
  - (B) identify the feelings of others.

- (14) Social and emotional health--perseverance. The physically literate student perseveres while addressing challenges. The student is expected to explain how practicing challenging physical activities can build confidence and minimize frustration when learning a variety of new skills.
- (15) Social and emotional health--accepting and providing constructive feedback. The physically literate student accepts and provides constructive feedback. The student is expected to listen respectfully to make appropriate changes in performance based on feedback.
- (16) Lifetime wellness--application of lifetime wellness. The physically literate student identifies the value of lifetime wellness. The student is expected to:
  - (A) differentiate among types of and participate in moderate to vigorous physical activity for a sustained period of time on a regular basis using technology when available; and
  - (B) select and participate in physical activity for personal enjoyment.

**§117.111. Art, Grade 3, Adopted 2013.**

- (a) Knowledge and skills.
- (1) Foundations: observation and perception. The student develops and expands visual literacy skills using critical thinking, imagination, and the senses to observe and explore the world by learning about, understanding, and applying the elements of art, principles of design, and expressive qualities. The student uses what the student sees, knows, and has experienced as sources for examining, understanding, and creating artworks. The student is expected to:
    - (A) explore ideas from life experiences about self, peers, family, school, or community and from the imagination as sources for original works of art;
    - (B) use appropriate vocabulary when discussing the elements of art, including line, shape, color, texture, form, space, and value, and the principles of design, including emphasis, repetition/pattern, movement/rhythm, contrast/variety, balance, proportion, and unity; and
    - (C) discuss the elements of art as building blocks and the principles of design as organizers of works of art.
  - (2) Creative expression. The student communicates ideas through original artworks using a variety of media with appropriate skills. The student expresses thoughts and ideas creatively while challenging the imagination, fostering reflective thinking, and developing disciplined effort and progressive problem solving skills. The student is expected to:
    - (A) integrate ideas drawn from life experiences to create original works of art;
    - (B) create compositions using the elements of art and principles of design; and
    - (C) produce drawings; paintings; prints; sculpture, including modeled forms; and other art forms such as ceramics, fiber art, constructions, mixed media, installation art, digital art and media, and photographic imagery using a variety of materials.
  - (3) Historical and cultural relevance. The student demonstrates an understanding of art history and culture by analyzing artistic styles, historical periods, and a variety of cultures. The student develops global awareness and respect for the traditions and contributions of diverse cultures. The student is expected to:
    - (A) identify simple main ideas expressed in artworks from various times and places;
    - (B) compare and contrast artworks created by historical and contemporary men and women, making connections to various cultures;
    - (C) connect art to career opportunities for positions such as architects, animators, cartoonists, engineers, fashion designers, film makers, graphic artists, illustrators, interior designers, photographers, and web designers; and
    - (D) investigate the connections of visual art concepts to other disciplines.

- (4) Critical evaluation and response. The student responds to and analyzes artworks of self and others, contributing to the development of lifelong skills of making informed judgments and reasoned evaluations. The student is expected to:
- (A) evaluate the elements of art, principles of design, or expressive qualities in artworks of self, peers, and historical and contemporary artists;
  - (B) use methods such as oral response or artist statements to identify main ideas found in collections of artworks created by self, peers, and major historical or contemporary artists in real or virtual portfolios, galleries, or art museums; and
  - (C) compile collections of personal artworks such as physical artworks, electronic images, sketchbooks, or portfolios for purposes of self assessment or exhibition.

**§117.112. Music, Grade 3, Adopted 2013.**

- (a) Knowledge and skills.
  - (1) Foundations: music literacy. The student describes and analyzes musical sound. The student is expected to:
    - (A) categorize and explain a variety of musical sounds, including those of children and adult voices;
    - (B) categorize and explain a variety of musical sounds, including those of woodwind, brass, string, percussion, and instruments from various cultures;
    - (C) use known music symbols and terminology referring to rhythm; melody; timbre; form; tempo; and dynamics, including mezzo piano and mezzo forte, to identify musical sounds presented aurally; and
    - (D) identify and label small and large musical forms such as abac, AB, and ABA presented aurally in simple songs and larger works.
  - (2) Foundations: music literacy. The student reads, writes, and reproduces music notation using a system. Technology and other tools may be used to read, write, and reproduce musical examples. The student is expected to:
    - (A) read, write, and reproduce rhythmic patterns using standard notation, including four sixteenth notes, whole notes, whole rests, and previously learned note values in 2/4 and 4/4 meters as appropriate;
    - (B) read, write, and reproduce extended pentatonic melodic patterns using standard staff notation; and
    - (C) identify new and previously learned music symbols and terms referring to tempo and dynamics, including mezzo piano and mezzo forte.
  - (3) Creative expression. The student performs a varied repertoire of developmentally appropriate music in informal or formal settings. The student is expected to:
    - (A) sing or play classroom instruments with accurate intonation and rhythm independently or in groups;
    - (B) sing or play a varied repertoire of music such as American folk songs and folk songs representative of local cultures independently or in groups;
    - (C) move alone or with others to a varied repertoire of music using gross motor, fine motor, locomotor, and non-locomotor skills and integrated movement such as hands and feet moving together;
    - (D) perform simple part work, including rhythmic and melodic ostinati, derived from known repertoire; and
    - (E) interpret through performance new and previously learned music symbols and terms referring to tempo and dynamics, including mezzo piano and mezzo forte.
  - (4) Creative expression. The student creates and explores new musical ideas within specified guidelines. The student is expected to:

- (A) create rhythmic phrases through improvisation or composition;
  - (B) create melodic phrases through improvisation or composition; and
  - (C) create simple accompaniments through improvisation or composition.
- (5) Historical and cultural relevance. The student examines music in relation to history and cultures. The student is expected to:
- (A) perform a varied repertoire of songs, movement, and musical games representative of American and local cultures;
  - (B) identify music from diverse genres, styles, periods, and cultures; and
  - (C) identify the relationships between music and interdisciplinary concepts.
- (6) Critical evaluation and response. The student listens to, responds to, and evaluates music and musical performances. The student is expected to:
- (A) exhibit audience etiquette during live and recorded performances;
  - (B) recognize known rhythmic and melodic elements in aural examples using appropriate vocabulary;
  - (C) identify specific musical events in aural examples such as changes in timbre, form, tempo, or dynamics using appropriate vocabulary;
  - (D) respond verbally and through movement to short musical examples; and
  - (E) describe a variety of compositions and formal or informal musical performances using specific music vocabulary.

**§117.113. Theatre, Grade 3, Adopted 2013.**

- (a) Knowledge and skills.
  - (1) Foundations: inquiry and understanding. The student develops concepts about self, human relationships, and the environment using elements of drama and conventions of theatre. The student is expected to:
    - (A) react to sensory and emotional experiences such as sight or sound and happiness or sadness through creative play;
    - (B) create playing space using expressive and rhythmic movement;
    - (C) respond to sounds, music, images, language, and literature using movement; and
    - (D) reflect the environment, portray character, and demonstrate actions in classroom dramatizations.
  - (2) Creative expression: performance. The student interprets characters using the voice and body expressively and creates dramatizations. The student is expected to:
    - (A) demonstrate safe use of movement and voice;
    - (B) participate in a variety of roles in real life or imaginative situations through narrative pantomime, dramatic play, or story dramatization;
    - (C) dramatize literary selections using shadow play or puppetry; and
    - (D) dramatize literary selections using pantomime and imitative dialogue.
  - (3) Creative expression: production. The student applies design, directing, and theatre production concepts and skills. The student is expected to:
    - (A) identify technical theatre elements such as props, costumes, sound, and visual elements that define character, environment, action, and theme;
    - (B) use simple technical theatre elements such as props, costumes, sound, and visual elements that define character, environment, action, and theme;
    - (C) plan dramatic play;
    - (D) cooperate and interact with others in dramatic play; and
    - (E) observe live or multimedia theatrical performances.
  - (4) Historical and cultural relevance. The student relates theatre to history, society, and culture. The student is expected to:
    - (A) explore historical and diverse cultural influences from a variety of sources through dramatic activities;
    - (B) illustrate similarities and differences between life and theatre, television, and film through dramatic play; and
  - (5) Critical evaluation and response. The student responds to and evaluates theatre and theatrical performances. The student is expected to:
    - (A) apply appropriate audience behavior consistently;
    - (B) discuss and evaluate simple dramatic activities and performances; and
    - (C) discuss the use of music, movement, and visual components in dramatic activities and performances.

**§126.7. Technology Applications, Grades 3-5, Beginning with School Year 2012-2013.**

- (a) Knowledge and skills.
  - (1) Creativity and innovation. The student uses creative thinking and innovative processes to construct knowledge and develop digital products. The student is expected to:
    - (A) create original products using a variety of resources;
    - (B) analyze trends and forecast possibilities, developing steps for the creation of an innovative process or product; and
    - (C) use virtual environments to explore systems and issues.
  - (2) Communication and collaboration. The student collaborates and communicates both locally and globally using digital tools and resources to reinforce and promote learning. The student is expected to:
    - (A) draft, edit, and publish products in different media individually and collaboratively;
    - (B) use font attributes, color, white space, and graphics to ensure that products are appropriate for multiple communication media, including monitor display, web, and print;
    - (C) collaborate effectively through personal learning communities and social environments;
    - (D) select and use appropriate collaboration tools;
    - (E) evaluate the product for relevance to the assignment or task; and
    - (F) perform basic software application functions, including opening applications and creating, modifying, printing, and saving files.
  - (3) Research and information fluency. The student acquires and evaluates digital content. The student is expected to:
    - (A) use various search strategies such as keyword(s); the Boolean identifiers *and*, *or*, and *not*; and other strategies appropriate to specific search engines;
    - (B) collect and organize information from a variety of formats, including text, audio, video, and graphics;
    - (C) validate and evaluate the relevance and appropriateness of information; and
    - (D) acquire information appropriate to specific tasks.
  - (4) Critical thinking, problem solving, and decision making. The student researches and evaluates projects using digital tools and resources. The student is expected to:
    - (A) identify information regarding a problem and explain the steps toward the solution;
    - (B) collect, analyze, and represent data to solve problems using tools such as word processing, databases, spreadsheets, graphic organizers, charts, multimedia, simulations, models, and programming languages;
    - (C) evaluate student-created products through self and peer review for relevance to the assignment or task; and

- (D) evaluate technology tools applicable for solving problems.
- (5) Digital citizenship. The student practices safe, responsible, legal, and ethical behavior while using digital tools and resources. The student is expected to:
  - (A) adhere to acceptable use policies reflecting positive social behavior in the digital environment;
  - (B) respect the intellectual property of others;
  - (C) abide by copyright law and the Fair Use Guidelines for Educational Multimedia;
  - (D) protect and honor the individual privacy of oneself and others;
  - (E) follow the rules of digital etiquette;
  - (F) practice safe, legal, and responsible use of information and technology; and
  - (G) comply with fair use guidelines and digital safety rules.
- (6) Technology operations and concepts. The student demonstrates knowledge and appropriate use of technology systems, concepts, and operations. The student is expected to:
  - (A) demonstrate an understanding of technology concepts, including terminology for the use of operating systems, network systems, virtual systems, and learning systems appropriate for Grades 3-5 learning;
  - (B) manipulate files using appropriate naming conventions; file management, including folder structures and tagging; and file conversions;
  - (C) navigate systems and applications accessing peripherals both locally and remotely;
  - (D) troubleshoot minor technical problems with hardware and software using available resources such as online help and knowledge bases; and
  - (E) use proper touch keyboarding techniques and ergonomic strategies such as correct hand and body positions and smooth and rhythmic keystrokes.
